About This Game

Zvezda is a 3D space combat simulation. It is inspired by games such as Wing Commander, Freespace, X-Wing...

You are a pilot of space fighter, a small but destructive space ship, fully armed with plasma guns and missiles. Your carrier, Zvezda is cut behind enemy lines and through ten missions, you and your team try to strike back at merciless enemy.

Missions consist of defending your carrier, flying reconnaissance missions and destroying enemy capital ships.

Typical mission starts with briefing, where you will learn about mission. Than you will take off from carrier and will then navigate (hyper jump) from waypoint to waypoint. At each way point, you are expected to clear enemy presence and defend our capital ships. Typically, you will fly with a group of wingmen.

Games is best to be played with a joystick, since game is quite demanding, at least at high difficulty. Joystick adds much fun into gameplay. It is strictly single player, with emphasis on flying and fighting and not on trading, building or strategy.

Game uses **AUTOCENTER** so it automatically tracks enemies - if you don't have a joystick, this is a must!

Game has just been upgraded:

- many bug fixes
- two fighters to choose from
- gameplay, fights
- added missiles
- improved campaign

Default keys:

- M- missile
- Left ctrl - guns
- J - jump
- C - communications
- T - target enemy
- F - target friendly
- W,S - throttle (or joystick throttle)
- Tab - turbo (or mouse wheel or joystick throttle)
- Arrow keys - rotate (or mouse or joystick)
- space - center on target

Rake in Grass. **Irony Curtain's Revolutionary Update #1:**

Comrades!

Thank you for purchasing the Irony Curtain: From Matryoshka with Love! We hope that your journey to the bestest country in the world was as great as babushka's compot! If so, [leave as a Steam Review](#) – for the glory of Matryoshka!

This is the first of a few updates to Irony Curtain. We are aware that Western Spies have planted some bugs here and there, but our special antispy forces are ready to eliminate them once and for all!

That's why we're presenting you the official Revolutionary Update with some fixes and polishes, including:

- fixed a few active area points for better cursor feedback;
- fixed a blocking bug that could occur when exiting the Floor Run minigame while Evan is still running;
- fixed sound timing for two final cutscenes;
- fixed errors and typos in the German version of the game;
- made The Butcher's line of business more obvious.

As you might have noticed, the premiere build is missing manual save slots. We've found that there is a possibility that reloading the manual save might fail to call all of the proper actions and changes on a scene, which can cause errors. Since those errors might be game blocking in specific cases, we decided to turn this feature off and only bring it back when we are 300% sure that it works properly. Hopefully, this happens very very soon.

Don't forget to spread the love for the bestest country in the world on your social media, using #IronyCurtain hashtag. You can also reach us on [Irony Curtain's Steam Forum](#).

Yours truly,
Star Conflict Team. **[UPDATE]: Basic multiplayer added to HB14:**

It's been a long time coming so we're excited to announce that with this update multiplayer has been added to HB14. Although the new version runs smoother and has more possibilities than HB13 multiplayer it is still pretty experimental so bugs may and probably will occur.

The update will allow you to meet up with friends and host LAN/online servers. We really look forward towards seeing you guys in multiplayer and would like to thank everyone who has been helping us to improve the game so far.

<https://indiegamepicks.wordpress.com/2019/03/05/theseus-journey-to-athens/>

Indie Game Picks, a curator and also an indie games review site and twitter handle, has reviewed Theseus: Journey to Athens!

Here's the review, it seems they enjoyed it:

Theseus: Journey to Athens

Developer: Antiquity Studio

Publisher: Antiquity Studio
Release: 2019
Genre: Adventure/RPG
Art Style: 3D / Drawing
Platforms: Steam/itch.io

Are you a fan of ancient Greek mythology, with heroes, monsters and bickering gods? How about choose-your-own-adventure games with different options and outcomes? If yes, then Theseus: Journey to Athens is a game you should check out.

It was created by Antiquity Studio, a US based dev consisting of a single person, Adam Delderfield, a criminal prosecutor who in his spare time creates video games based on ancient texts. The artwork and music were contracted to Klaudia Jankowska and Michael Landers respectively.

In Theseus: Journey to Athens, you play as the aforementioned mythological hero, before his trip to Crete and the widely known story of the Maze and the Minotaur. You start in his home village of Troezen and you follow his adventures towards Athens. The story is heavily rooted in classical texts like Pausanias' Guide to Greece, Plutarch's Life of Theseus, Apollodorus' Bibliotheca, and shorter works and fragments such as those of Bacchylides.

The game has three different aspects, exploring, decision making and combat. First of all, the exploration. This is mainly done in classic top-down RPG mode, like the Infinity engine classics. During this you can visit different areas and start conversations with NPCs. The graphics are old-school, but do their job. The only problem was that the walking animation is a bit weird, but, with only one man at the helm, it doesn't really matter to me.

(Image on site)

The second part, the decision making, is where the game truly shines for me. When you enter this mode, the screen fills with text, along with an image. The events are well written and, while a bit simplistic in nature, they can affect your playthrough, even to the point of an early game over screen! Have to say that, I originally thought it would be just the city of Troezen, which I finished in 20 minutes or so, but later on I realised I did wrong choices and just died before reaching the next stage! Keep that in mind, because after each section, you get a screen about how your options changed things and that might make you think that the game ended.

The third part I would say is also the weakest, combat. It is classic turn-based combat with some skills available. There are no animations available, and it is pretty simplistic, while some of the battles should be solved via an event rather than direct combat. However, it has its purpose, providing a layer of strategy and confrontation in an otherwise text-only title.

All in all, this is an interesting title, complemented with good writing, beautiful artwork and cool music, along with a really low price (less than 10 EUR). Fans of choose-your-own-adventures and ancient Greek mythology should definitely check it out.
